Alerting Abstract JP A

NOVELTY - New active oxygen scavenger comprises kojic acid and/or its physiologically acceptable salts.

INDEPENDENT CLAIMS are also included for:

1. the composition containing the active oxygen scavenger used for eliminating active oxygen; and
2. cosmetic containing kojic acid and/or its salts used against wrinkles caused by light.

USE - The composition containing active oxygen scavenger is used for cosmetics, food or medicine.

ADVANTAGE - The active oxygen scavenger has excellent active oxygen scavenging activity, especially suitable for singlet oxygen.

ABSTRACT

PROBLEM TO BE SOLVED: To provide an active oxygen scavenging agent having excellent scavenging action on active oxygen, especially singlet oxygen and provide a composition containing the agent such as cosmetics, foods or pharmaceuticals.

SOLUTION: Kojic acid having excellent singlet oxygen scavenging action or its physiologically permissible salt is included in cosmetics, foods or pharmaceuticals.
